Pressure Regulator Awareness Training

Presented by: Olivier Bravin

Swagelok

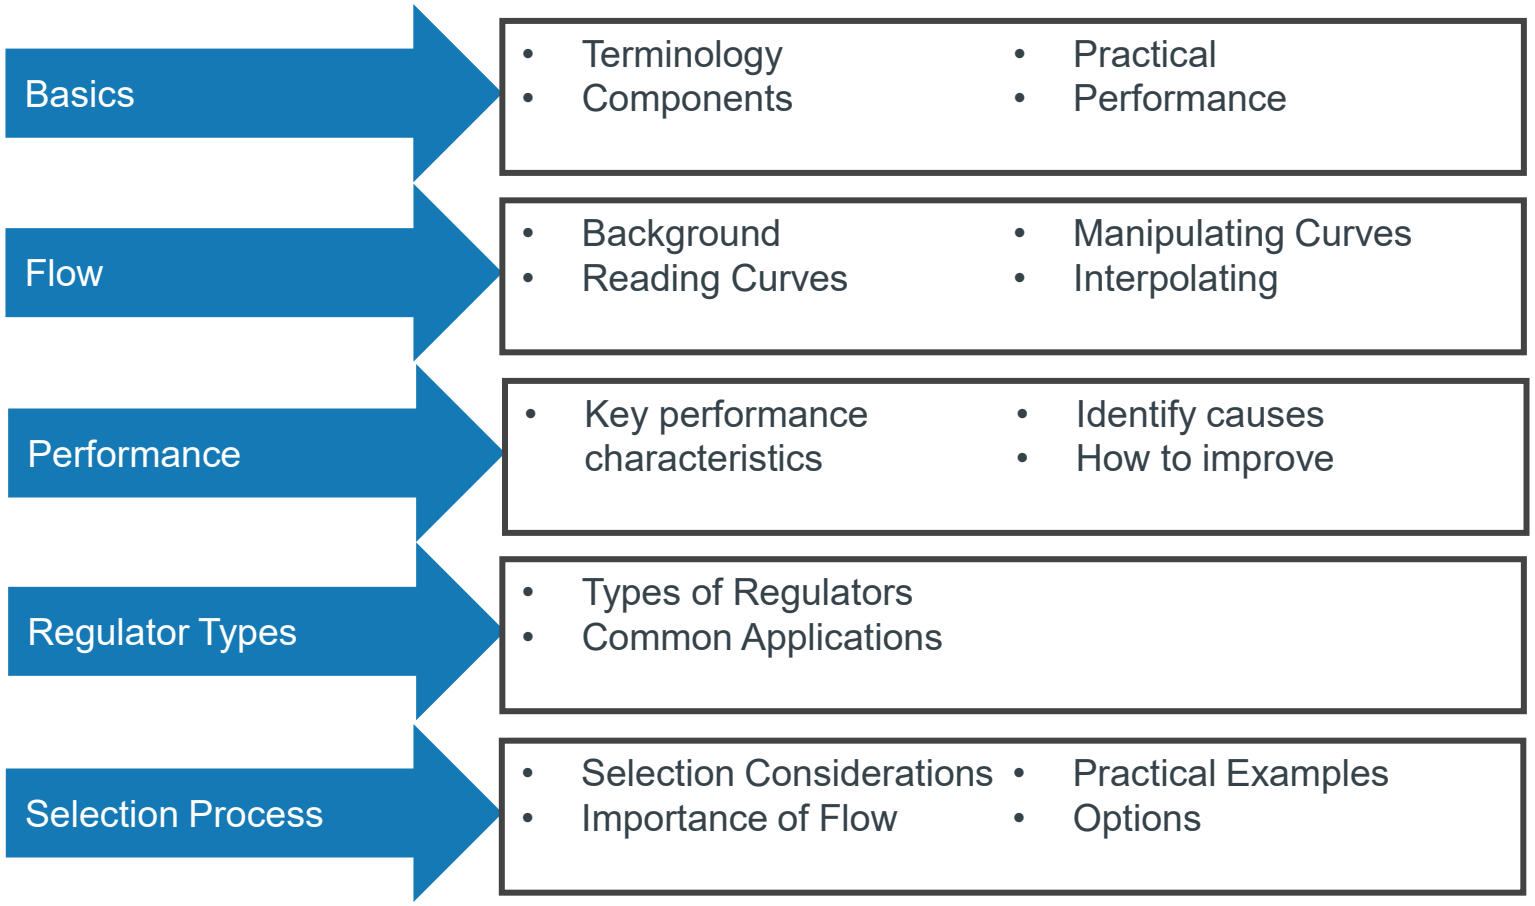

Course Objectives

Upon completion of this course, you should be able to:

- Understand pressure regulators terminology, principles and key definitions
- Identify the internal components of a pressure regulator and explain their functions
- Understand the factors that influence regulator performance
- Identify causes of key performance characteristics
- Contrast methods to improve or mitigate
- Read a flow curve and extract performance information
- Review different types of regulators & applications
- Select the appropriate pressure regulator for the application

Agenda

© 2026 Swagelok Company.

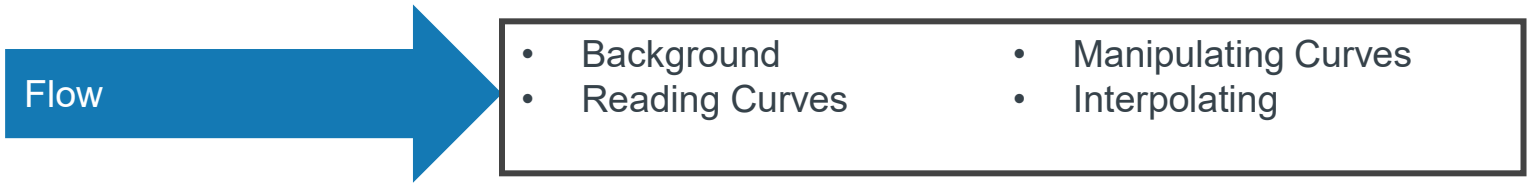

Section Objectives

- **Understand pressure regulators terminology, principles and key definitions**
- **Identify the internal components of a pressure regulator and explain their functions**
- **Correctly assemble a pressure regulator**
- **Understand the factors that influence regulator performance**

© 2026 Swagelok Company.

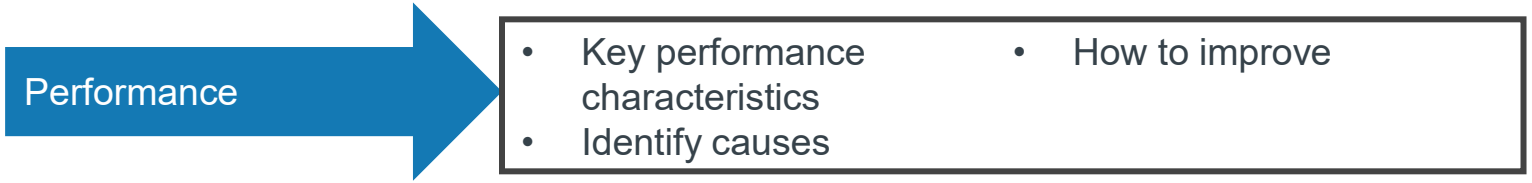

Section Objectives

- **Understand Flow terminology and definitions**
- **Recognize different areas of a pressure regulator Flow curve**
- **Select and manipulate Flow curve to support application design**
- **Interpolate Flow curve and calculate performance for various fluids**

© 2026 Swagelok Company.

Section Objectives

- **Discuss the key performance characteristics of pressure regulators**
- **Identify causes of key performance characteristics**
- **Contrast methods to improve or mitigate**

© 2026 Swagelok Company.

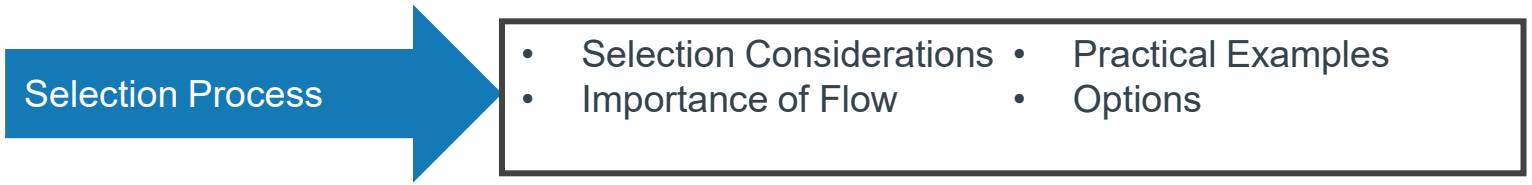

Section Objectives

- **Review different types of regulators**
- **Identify common applications for types of regulator**

© 2026 Swagelok Company.

Section Objectives

- **Select the appropriate pressure regulator for the application**
- **Understand the importance of flow**
- **Interpret and evaluate regulator flow curves**
- **Identify and select suitable options and accessories**
